Full Stack Web Development?

Why?

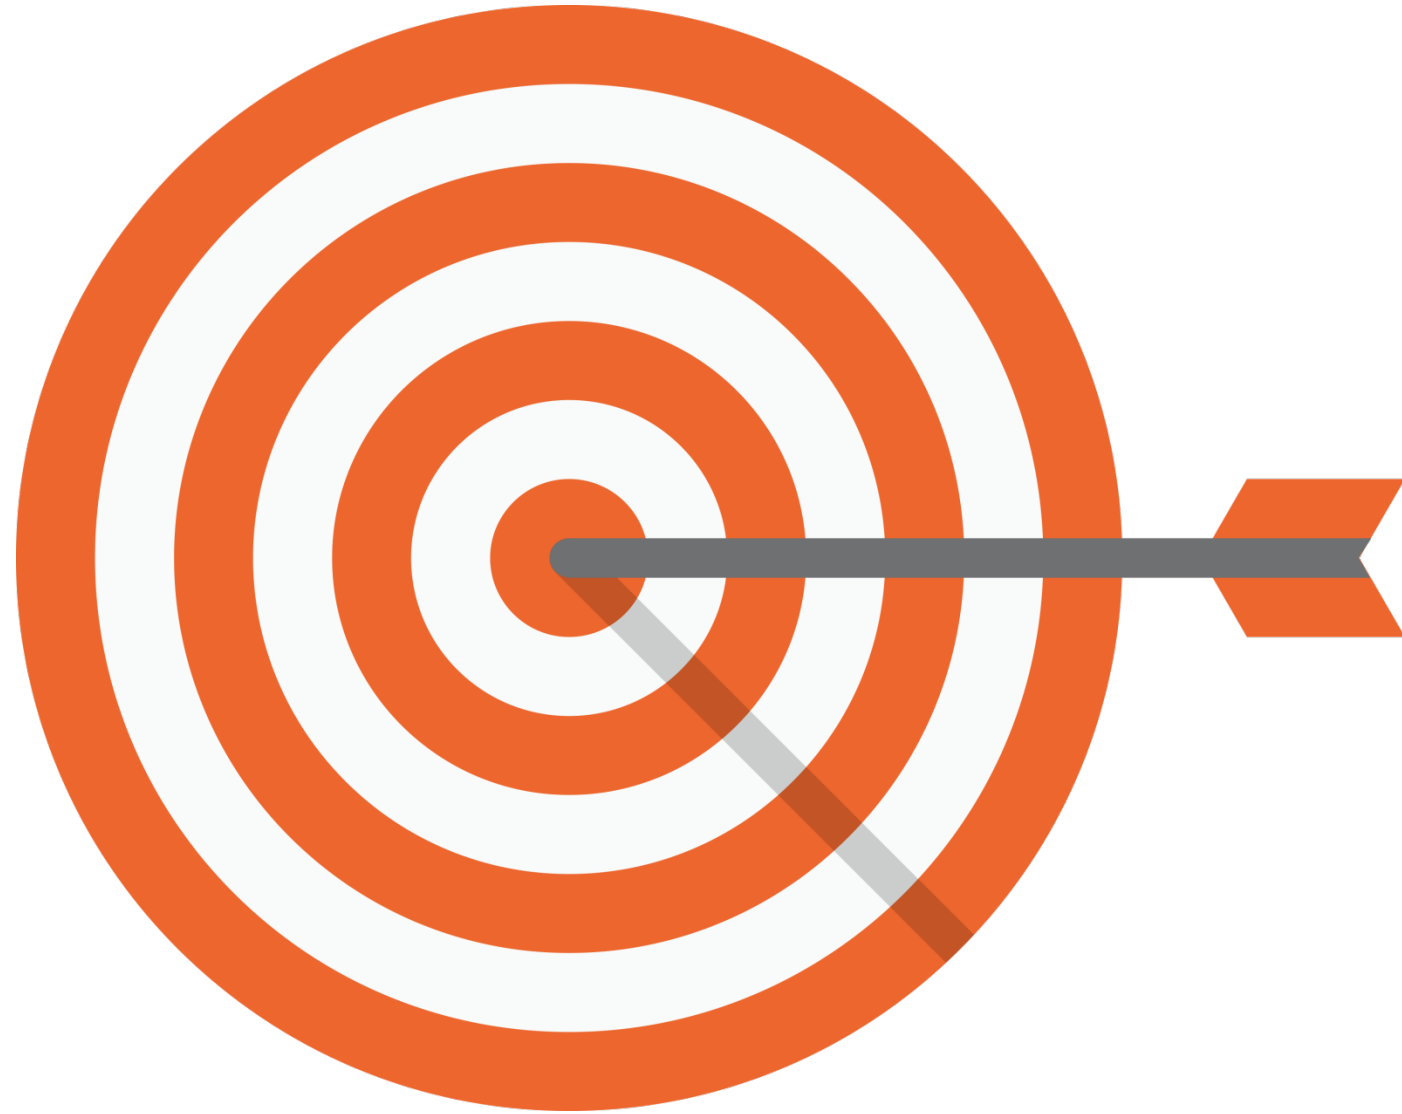

Who?

How Is This Course Organized?

```
def display_form():
    form = SQLFORM(db.blog)
    if form.process().accepted:
        session.flash = 'form accepted'
        redirect(URL('thanks'))
    elif form.errors:
        response.flash = 'form has errors'
    else:
        response.flash = 'please fill out the form'
    return locals()
```
